EDUCATION

California State University, Fullerton **May 2026**

B.S. in Computer Science, Minor in Data Science | Summa Cum Laude, GPA: 3.91/4.0

- **Relevant Courses:** DevOps, Cloud Computing & Security, Machine Learning, Database Application, Backend & Frontend Engineering

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, R, JavaScript

Machine Learning / Data Science: SKLearn, NumPy, Pandas, Matplotlib, SciPy, PyTorch, TensorFlow

Cloud & Infrastructure: AWS, Docker, Terraform

Web Development: React, Express, Node.js, HTML, CSS

Platforms & Tooling: Git, Linux, GitHub Actions, Firebase, MongoDB

CERTIFICATIONS

AWS Certified AI Practitioner | Amazon Web Services — Oct 2026

Google AI Professional Certificate | Google (Coursera) — Oct 2026

AWS Certified Cloud Practitioner | Amazon Web Services (AWS) | Earned: July 2026

CodePath Advanced AI-Native Software Engineering: Open Source Capstone | Codepath | Earned: May 2026

EXPERIENCE

Digital Homelessness Initiative | *Machine Learning Research Intern* **Aug 2024 – May 2026**

- Collected sensor training data and deployed a decision tree model on an ESP32 microcontroller (C++) to detect medical emergencies, achieving 90% accuracy on room occupancy detection.
- Collaborated with a Computer Engineering team to optimize sensor data collection and ingestion protocols across hardware and software.
- Presented the research to a board of faculty and other departments, then onboarded the next generation of interns to carry the work forward.

SoCal Data Science Fellowship | *Data Science Intern* **Jan 2024 – Aug 2024**

- Built an automated data pipeline to process and analyze a 45,000 subject national research dataset (NACC), reaching 0.91 AUC across benchmarked models.
- Presented findings at an NSF funded research symposium, translating technical results for cross disciplinary stakeholders.

PROJECTS

AWS Document Storage AI Summarizer | *DevOps* [https://github.com/KentvTran/Document-Storage-App]

- Authored 3 CloudFormation templates provisioning 5 AWS stacks (Cognito auth, API Gateway, Lambda, S3, CloudWatch) as Infrastructure as code, deploying all stacks.
- Implemented a GitHub Actions CI/CD pipeline to deploy all 5 stacks automatically, applying Git workflows and testing to eliminate manual errors and cut setup time to minutes.
- Configured CloudWatch alarms and SNS notifications to monitor application health and catch latency and error spikes in production.

Infant Mortality Prediction | *IEEE* [https://ieeexplore.ieee.org/document/11135418]

- Attained 90% accuracy predicting infant mortality; presented and published findings at the IEEE International Conference on Circuits, Systems, and Communication.
- Designed an end-to-end data pipeline and benchmarked Random Forest, Naive Bayes, Logistic Regression, and XGBoost to reach that accuracy.

ACTIVITIES

Association for Computing Machinery | *Operations Organizer* **Aug 2022 – May 2026**

- Placed 1st of 300+ participants at FullyHacks as a first time hacker, then joined the organizing team to help run FullyHacks events.
